

Latest wiki

This page aims to provide link to the flagship/latest wiki.
 Each ecosystem releases flow has its corresponding wiki.

An **ecosystem release flow** designates all the **ecosystem releases** which are based on the **same versions of the major software components** (e.g. Linux[®] kernel) of the OpenSTLinux distribution (see details in the below table).
 Each **vx** flow groups together all the **vx.y.z** ecosystem releases, and has **its own wiki**.

The most recent flow is associated with the **flagship/latest wiki** (whose URL is "https://wiki.st.com/stm32mpu"), while the previous flows are associated with **archived wikis** (whose URLs are "https://wiki.st.com/stm32mpu-ecosystem-vx").

This current wiki is a wiki archived for the v1 flow (v1.y.z ecosystem releases): if you need information about this ecosystem releases flow, continue browsing this wiki.

However, **if you discover the STM32 Arm[®] Cortex[®]-based MPUs, it is highly recommended to browse the flagship/latest wiki** that contains the **latest major ecosystem release**:
