

STM32MPU Embedded Software distribution

Contents

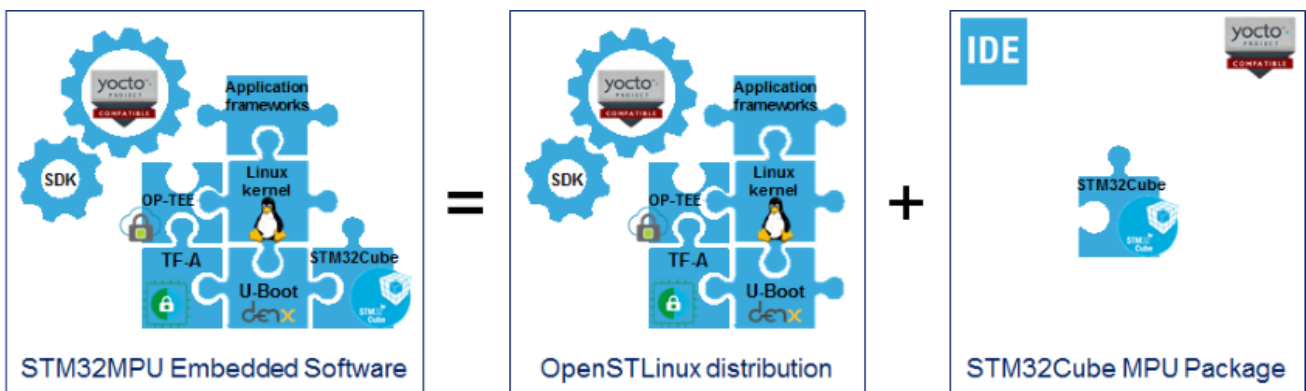

A quality version of this page, approved on 9 October 2019, was based off this revision.

STM32MPU Embedded Software distribution is a set of software (STM32MPU Embedded Software architecture overview), system build and development tools created to ease the development to be done on top of STM32 MPU devices.

STM32MPU Embedded Software distribution includes:

- a Linux® distribution, running on the Arm® Cortex®-A processor(s) : OpenSTLinux distribution
- a STM32Cube MPU Package, running on the Arm® Cortex®-M processor : STM32CubeMP1 Package

STM32 supported device	Ecosystem release note	Boards	Starter Package	Developer Package	Distribution Package
STM32MP15	STM32MP15 ecosystem release note	Evaluation boards	STM32MP15 Evaluation boards - Starter Package	STM32MP1 Developer Package	STM32MP1 Distribution Package
		Discovery kits	STM32MP15 Discovery kits - Starter Package		

If you are not yet familiar with the **STM32MPU Embedded Software Packages**, please read this article [Which Package better suits your needs.](#)
