Category:STM32MPU Embedded Software distribution for Android

A quality version of this page, approved on 17 June 2020, was based off this revision.

STM32MPU Embedded Software distribution for Android™ is a set of software components (see [STM32MPU Embedded Software for Android architecture overview](#)), system build and development tools created to ease the development of applications on STM32 MPU devices (see [STM32 MPU devices](#)).

STM32MPU Embedded Software distribution for Android includes:

- a distribution for Android, running on Arm®Cortex®-A processors: [STM32MPU distribution for Android](#)
- an STM32Cube MPU Package, running on Arm®Cortex®-M processors: [STM32CubeMP1 Package](#)

STM32 supported device	Ecosystem release note	Boards	Starter Package	Developer Package	Distribution Package
STM32MP15	STM32MP15 ecosystem release note	Evaluation boards	STM32MP15 Evaluation boards - Starter Package for Android	STM32MP1 Developer Package for Android	STM32MP1 Distribution Package for Android

If you are not yet familiar with **STM32MPU Embedded Software Packages**, please read [Which STM32MPU Embedded Software Package for Android better suits your needs](#).
