## 1 Usage

---

The `ArticleToRename` template is used **to request the renaming (or move) of a page**. It should be added as the very first line on the page that you believe should be renamed (or moved).

It puts a message box with a "pink arrow" icon in the page, and adds this page to the [Candidates for renaming](#) category.

Wiki maintainers periodically have a look at this category, and rename (move) the pages that belong to it.

```
Usage:  {{ArticleToRename | <new name> | <reason> | <signature>}}
```

Where `<new name>`, `<reason>` and `<signature>` are **mandatory** parameters:

- `<new name>` is the new name requested for the article
- `<reason>` is the reason supplied for the renaming (move)
- `<signature>` is the signature of the requester. It is recommended to use `~~~~` wiki markup to sign the request
