A [quality version](#) of this page, [accepted](#) on *17 June 2020*, was based off this revision.

This category groups together all articles related to the Linux[®]**RAM memory** software framework.

It is recommended to first read the [Reserved memory](#) article.

Random Access Memory (Early computer memories generally had serial access. Memories where any given address can be accessed when desired were then called "random access" to distinguish them from the memories where contents can only be accessed in a fixed order. The term is used today for volatile random-access semiconductor memories.)
