Contents

A quality version of this page, approved on 17 June 2020, was based off this revision.

STM32MPU Embedded Software distribution for Android™ is a set of software components (see [STM32MPU Embedded Software for Android architecture overview](#)), system build and development tools created to ease the development of applications on STM32 MPU devices (see [STM32 MPU devices](#)).

STM32MPU Embedded Software distribution for Android includes:

- a distribution for Android, running on Arm® Cortex®-A processors: **STM32MPU distribution for Android**
- an STM32Cube MPU Package, running on Arm® Cortex®-M processors: **STM32CubeMP1 Package**

Warning

The STM32MPU distribution for Android™ is not yet available in the v3 ecosystem releases: please refer to the [Category:STM32MPU Embedded Software distribution for Android](#) page for the v2 ecosystem releases (in archived wiki).

STM32 supported device	Ecosystem release note	Boards	Starter Package	Developer Package	Distribution Package
STM32MP15	STM32MP15 ecosystem release note	Evaluation boards	STM32MP15 Evaluation boards - Starter Package for Android	STM32MP1 Developer Package for Android	STM32MP1 Distribution Package for Android

If you are not yet familiar with **STM32MPU Embedded Software Packages**, please read [Which STM32MPU Embedded Software Package for Android better suits your needs](#).
