Develop on Arm® Cortex®-M4

Install the IDE

Install the STM32Cube MP1 package

Modify, rebuild and reload a firmware

This module guides you through installing the STM32MP1 Developer Package to develop on Arm® Cortex®-M4.

The STM32MP1 Developer Package contains (for the Arm® Cortex®-M4) the STM32Cube MPU Package that includes the source codes of all software components (BSP, HAL, middleware and applications).
