Stable: 16.01.2020 - 14:17 / Revision: 16.01.2020 - 14:13

A [quality version](#) of this page, [accepted](#) on 16 January 2020, was based off this revision.

You, **as STMicroelectronics customers**, are responsible for compliance with the applicable license terms for any open source software included in the *STM32MPU Embedded Software* and related tools.

The following items constitute a non-exhaustive list of major elements to be considered by **You** prior to productizing a device based on *STM32MPU Embedded Software*.

## Contents

1 GPLv3 .....	3
<b>1.1 How to identify GPLv3 content in STM32MPU Embedded Software? .....</b>	<b>3</b>
<b>1.2 How to manage GPLv3 content in STM32MPU Embedded Software? .....</b>	<b>3</b>
2 Audio/Video .....	4
3 Licences .....	4

## 1 GPLv3

*STM32MPU Embedded Software* embeds GPLv3 content.

It is Your responsibility, to comply with GPLv3 license terms when distributing GPLv3 content including, but not limited to, as embedded into your commercial product, and:

- either to remove the unwanted GPLv3 content from Your distribution,
- or to ensure compliance with the applicable license terms for any software included in Your distribution.

### 1.1 How to identify GPLv3 content in STM32MPU Embedded Software?

- A file containing all the software components and their respective license is available in each *STM32MPU Embedded Software* official release
- In the [Distribution Package](#), each [OpenEmbedded](#) recipe includes license information

### 1.2 How to manage GPLv3 content in STM32MPU Embedded Software?

- You can list all the GPLv3 content
- You can:
  - Replace the GPLv3 content by an equivalent non-GPLv3 content.

- Remove the GPLv3 content.

GPLv3 removal:

- In the Distribution Package, You may remove GPLv3 content by deleting it from the OpenEmbedded image recipe.
- You may remove GPLv3 content from the generated image.

## 2 Audio/Video

*STM32MPU Embedded Software*, through included open source, embeds many audio and video codecs that are compliant with standards.

A non-exhaustive list of such codecs are the following:

- AAC
- H264
- MPEG-4
- HEVC
- FLV1

It's Your responsibility to check the patent policies and procedures associated with such standards and determine whether a license will be required to any third party patents.

## 3 Licences

The exhaustive list of the latest version of STM32MPU Embedded Software distribution is available at [this location](#).

The exhaustive list of the latest version of STM32MPU Embedded Software distribution for Android™ is available at [this location](#).

## LegalInformation:Legal notice

*Stable: 15.04.2020 - 14:24 / Revision: 15.04.2020 - 14:21*

You, **as STMicroelectronics customers**, are responsible for compliance with the applicable license terms for any open source software included in the *STM32MPU Embedded Software* and related tools.

The following items constitute a non-exhaustive list of major elements to be considered by **You** prior to productizing a device based on *STM32MPU Embedded Software*.
