OpenSTLinux BSP architecture overview

Stable: 15.10.2019 - 09:53 / Revision: 15.10.2019 - 09:41

The **OpenSTLinux BSP** encompasses the following components:

- The **boot chain** based on **TF-A** and **U-Boot**
- The **OP-TEE secure OS** running on the Cortex-A in secure mode
- The **Linux kernel** running on the Cortex-A in non-secure mode

The figure below is clickable so that the user can directly jump to one of the sub-levels listed above.
