

## STM32MPU distribution for Android

A quality version of this page, accepted on 25 September 2020, was based off this revision.

The **STM32MPU distribution for Android™** runs on Arm®Cortex®-A processors. It is a subset of the STM32MPU Embedded Software distribution for Android.

It includes the following collection of software components:

- The **OpenSTLinux BSP** that offers services for the application frameworks in the same context:
  - The **boot chain** based on TF-A and U-Boot.
  - The **OP-TEE** secure OS running on the Cortex-A core in Secure mode.
  - The **Linux® kernel** running on the Arm® Cortex®-A core in Non-secure mode.
- **Application frameworks** that rely on the services provided by the **OpenSTLinux BSP** to provide specific functionalities (such as code libraries, APIs and tool sets) to ease the development of software applications:
  - **OP-TEE** application frameworks running in the secure OS user space (eg TEE Internal core API for the development of Trusted Applications (TA)).
  - **Android** application frameworks running in Linux OS user space (see AOSP<sup>[1]</sup> for more details).

The **OpenSTLinux BSP for Android** has some specificities:

- The Linux kernel source is based on the Common Kernel available in AOSP<sup>[2]</sup>.
- The Linux kernel configuration is based on the reference configuration available in AOSP<sup>[3]</sup>.

**Android** application frameworks are based on the AOSP platform manifest<sup>[4]</sup>. By default, one of the Google tags<sup>[5]</sup> is used as a reference.

The **Google services** (ex: Cast, Drive, Maps...) are neither embedded nor validated within this **STM32MPU distribution for Android™**.

---

## 1 How to get the software for this distribution?

---

The STM32MPU distribution for Android™ is not yet available in the v3 ecosystem releases: please refer to the [STM32MPU distribution for Android page for the v1 ecosystem releases \(in archived wiki\)](#).

The **STM32MPU distribution for Android™** is available through the three Packages (Starter, Developer, and Distribution) of the STM32MPU Embedded Software distribution for Android.
