

Create template: AlignRight

Create template: AlignRight

Category defined by template (optional):

Template fields

To have the fields in this template no longer require field names, simply enter the index of each field (e.g. 1, 2, 3, etc.) as the name, instead of an actual name.

Field name: ntic property: Field holds a list of values	Display label:	Sema	
---	----------------	------	--

Aggregation

To list, on any page using this template, all of the pages that have a certain property pointing to that page, specify the appropriate property below:

Semantic property:

Title for list:

Output format: Table Side infobox Plain text Sections
