## 1 Usage

The `ArticleBasedOnModel` template is used **to store, in a page, the name of the model on which the page is based**. It should be added at the bottom of the page that is based on a model. The models are available in the [Using models](#) category.

It puts a message box with a "light blue documents" icon in the page.

**Only signed-up users who have writing permissions, can see this box. However, do not put any confidential information in the parameters of this template.**

```
Usage: {{ArticleBasedOnModel | <model page>}}
```

Where:

- **<model page>** is the **mandatory** name of the model page **without its namespace** (e.g. if the model page is "Contributors:How to article model", then **<model page>** is "How to article model")

## 2 Basic examples

### You type

Article based on "Contributors:How to article model"  
model

```
{{ArticleBasedOnModel | How to article  
model}}
```

### You get

## 3 More examples

### You type

No model supplied

```
{{ArticleBasedOnModel}}
```

### You get

Article based on an unknown model: bad link

```
{{ArticleBasedOnModel | Unknown model}}
```

## 4 Code
