## 1 Usage

---

The HighlightParam template is used to **highlight parameters, values or options that must be set**, for example in commands, in pages. It formats the text with the STMicroelectronics corporate color **shade of light green** (`<parameter, value or option to highlight>`), and in **bold**.

```
Usage: {{HighlightParam|<parameter, value or option to highlight>}}
```

Where `<parameter, value or option to highlight>` is the parameter, value or option to highlight
