

Template:HighlightParam

Contents

1 Usage

The HighlightParam template is used to **highlight parameters, values or options that must be set**, for example in commands, in pages. It formats the text with the STMicroelectronics corporate color **shade of light green** (`<parameter, value or option to highlight>`), and in **bold**.

```
Usage: {{HighlightParam|<parameter, value or option to highlight>}}
```

Where `<parameter, value or option to highlight>` is the parameter, value or option to highlight

2 Basic examples

You type	You get
<p>Highlighting parameter, value or option</p> <pre>To change the current console {{HighlightParam <loglevel>}}, simply write to this file: {{Board\$}} echo {{HighlightParam <loglevel>}} > /proc/sys/kernel/printk</pre>	<p>To change the current console <loglevel>, simply write to this file:</p> <pre>Board \$> echo <loglevel> > /proc/sys /kernel/printk</pre>

3 More examples

You type	You get
<p>The parameter of the template is formatted in bold: it is useless because the template already formats in bold, but it keeps the parameter in bold</p> <pre data-bbox="124 645 1035 891"> To change the current console {{HighlightParam ''<loglevel>''}}, simply write to this file: {{Board\$}} echo ''{{HighlightParam <loglevel>}}'' > /proc/sys /kernel/printk </pre>	<p>To change the current console <loglevel>, simply write to this file:</p> <pre data-bbox="1058 696 1410 880"> Board \$> echo <lo glevel> > /proc /sys/kernel /printk </pre>
<p>The parameter of the template is formatted in italic: the parameter is then in bold and italic</p> <pre data-bbox="124 1037 1035 1283"> To change the current console {{HighlightParam ''<loglevel>''}}, simply write to this file: {{Board\$}} echo ''{{HighlightParam <loglevel>}}'' > /proc/sys /kernel/printk </pre>	<p>To change the current console <loglevel>, simply write to this file:</p> <pre data-bbox="1058 1088 1410 1272"> Board \$> echo <lo glevel> > /proc /sys/kernel /printk </pre>

4 Maintenance

This template is a template common to all ST wikis.

Modifications must be done into the [WikiModel](#). They must be reviewed by all ST wikis maintainers.

When approved, the template can be pushed/merged towards all ST wikis.
