1 Usage

The `PublicationRequestId` template is used **to store, in a page, the date and the identifier (ID) of the last publication request (PR) done to the technical writer team**, through the technical literature management system (TLMS), for publishing this page. It should be added at the bottom of the page for which a PR has been done.

It puts a message box with a "light blue checked document" icon in the page.

Only signed-up users who have writing permissions, can see this box. However, do not put any confidential information in the parameters of this template.

```
Usage: {{PublicationRequestId | <TLMS PR ID> | <date> | <comment>}}
```

Where:

- **<TLMS PR ID>** is the **mandatory** identifier of the publication request done in the TLMS
 - **Auto** is a special value for this parameter to indicate that the page has been automatically approved (no TLMS PR ID)
- **<date>** is the date of the request in the YYYY-MM-DD format. It is a **mandatory** parameter, except if **<TLMS PR ID>** is **Auto**
- **<comment>** is an **optional** comment. It is recommended to use this parameter **to indicate at least the name of the technical writer** who made the review

2 Basic examples

You type

Publication request: TLMS PR ID and date supplied

```
{{PublicationRequestId | 12345 | 2019-05-09 | AnneJ}}
```

Publication request: TLMS PR ID set with "Auto" and comment supplied

You get

```
{{PublicationRequestId | Auto | |  
Automatic approval based on the  
"Category model" article}}
```

3 More examples

You type

Publication request: no TLMS PR ID supplied, no date supplied

```
{{PublicationRequestId}}
```

Publication request: TLMS PR ID supplied, no date supplied

```
{{PublicationRequestId | 12345}}
```

Publication request: no TLMS PR ID supplied, date supplied

```
{{PublicationRequestId | | 2019-05-09}}
```
