

Template:UpdateNeededForNewRelease

1 Usage

The `UpdateNeededForNewRelease` template is used **to tag either a file, an article, a template, a chapter or a sentence that needs to be updated when a new ecosystem release is added in the wiki.**

It doesn't put anything seen by the reader in the page: it is only **a kind of "phantom" tag**. To retrieve all the pages that contain this tag (and so that need to be updated because a new ecosystem release is added in the wiki), it is enough to display [the pages that links this template](#). Then, searching for "UpdateNeededForNewRelease" in each page gives all the places where updates are needed.

```
Usage:  {{UpdateNeededForNewRelease| <comment>}}
```

Where `<comment>` is the **optional** comment to help updating .

2 Basic examples

You type

Update needed for new release without comment

```
Here is the list of the supported
ecosystem releases:
{{UpdateNeededForNewRelease}}
* R1
* R2
```

You get

Here is the list of the supported ecosystem releases:

- R1
- R2

Update needed for new release with comment

```
The '''vx.yy-stm32mp''' version of the
Linux kernel is supported.
{{UpdateNeededForNewRelease|Please
update the version}}
```

The **vx.yy-stm32mp** version of the Linux kernel is supported.
